About us

Our company, Tiny Toes Castle, has been operating a high-quality, licensed and previously Accredited Early Learning and Child Care center since 2010 in Central Alberta. We have been recognized locally and provincially for our programs and initiatives.

Philosophy

All children require responsive and nurturing high quality care to develop their full potential. Children also require a safe and healthy environment with educators with which they can build strong and secure relationships, feel loved, and accepted. We believe this type of care is best provided when both educators and parents work in collaboration for the well-being of the child. Moreover, the image of the child plays a critical role in creating an environment that supports children's learning and development; our image of the child decides how we treat children, set up the environment and build a curriculum for them. We view children as strong, capable, competent and constructors of their own learning. An environment where the child's interests and needs are met, and their home life is reflected can ensure a child feels valued and cared for.

At Namao Mighty Learners, we have a strong focus on play. We draw inspiration and principles from Reggio Emilia and have embedded them in our curriculum and approach. With Alberta's Early Learning and Care Framework Curriculum, our program's aim is to implement Flight. Our philosophy is to build an emergent curriculum based on children's interest gathered through observations and their knowledge that educators can build on. Children are viewed as mighty learners and constructors of their learning. Educators take on a role as a co-constructor.

Namao Mighty Learners

- Early Learning & Child Care -

Our program focuses on the needs of the community and strives to make a positive impact by acting as a resource center for parents and families and building community connections.

Our program offers

- High quality early learning and childcare program
- A safe, healthy, and nurturing environment for children to play, learn and grow in
- Creative, responsive, and reflective curriculum that is diverse, multicultural, and open-ended
- Thoughtfully designed spaces that promote exploration, relationships, and collaboration through play
- Collaborative partnerships with families and opportunities for parental involvement
- Reasonable fees as we believe all families should have access to high-quality care. We welcome parents on Subsidy!
