

## Responsible Use of Technology Resources Protocol Students

### PURPOSE

Sturgeon Public School Division provides students with technology resources that support learning. Technology resources refers to all resources on the network of Sturgeon Public Schools including, but not limited to, Internet access, email accounts, installed software, personal file storage areas, and all hardware attached to the network.

### PRINCIPLES OF USE

- All technology resources are intended for educational use.
- As the owner of all technology resources, Sturgeon Public Schools retains the right to monitor their use.
- The use of technology resources is subject to all policies and procedures of both the Division and individual schools/sites related to technology, property, or conduct.

### CONDITIONS OF USE

- Students shall use technology resources for appropriate educational purposes only.
- Students over 13 years of age are allowed to consider the responsible and ethical use of Artificial Intelligence (AI) tools for support in their learning and education. This can only be done if the following is agreed to and completed:
  - Teachers have discussed appropriate and responsible use of AI in learning and education with the student.
  - Parents are fully aware of which tool(s) will be used and how each is used.
  - During use, the student will ensure that no student or school identifying information is uploaded into any AI tool. Identifying information may include the name of any student, teacher, school, or the Division.
  - The use of AI is acknowledged or credited in any work the student submits. Submitting work supported by AI without acknowledging its use will be considered academic misconduct.

- AI is used in a manner that upholds a commitment to privacy, safety, and ethical standards, demonstrating the importance of digital citizenship and thoughtful application of technology.
- Students who discover material on the network that is inappropriate or makes them feel uncomfortable should report the material to a staff member.
- Students will use their assigned login only in the manner intended. This includes accessing only network resources assigned to their login. Students will not use another person’s files, output, or credentials.
- Students are responsible for the security access (login and password) to their network resources and will not share their credentials with anyone.
- Access to technology resources with personal devices is subject to AP 865: Information and Communication Technology, AP 901: Student Conduct, and individual school policies and practices.
- Consequences of inappropriate use of network resources could include disciplinary action including, but not limited to, loss of network privileges, recommendation for withdrawal from a course, suspension, financial liability for damages, or legal action.
- In the event of damage to a resource, the school or department will be responsible for the cost of the repair, remediation, or replacement (whichever is deemed most feasible) of the resource(s) that is/are damaged.
